## Welcome . . .

to the specialist in shipping packaging.

**Dear customer,**

In line with our motto „Pack and ship with progress“, we offer you mailing packaging with a reliable self-adhesive seal and secure tear thread.

Our products are mainly produced from renewable recycled raw materials. Selected cardboard qualities are used. The aim of our design department is to make all products as simple as possible, so that you can use them quickly and easily.

We attach great importance to the fact that our products not only meet your practical expectations but also in a balanced cost-benefit ratio.

Our competent employees therefore not only provide the ideal packaging solution, but also strive to offer you the best possible customer service.

Of course, we also develop packaging tailored to your specific needs. We produce and deliver both special sizes and system packaging.

Furthermore, we offer you various services such as: Packing, packaging, shipping as well as logistics.

Yours, Werner Fink  
Management

**Postal dispatch packaging**  
with self-adhesive seal and tear off strip

- 10 Mailing envelopes
- 19 Media packaging
- 21 Universal shipping packaging
- 28 Folder packaging
- 30 Mailing Tubes
- 36 Dispatch boxes
- 41 Wine shipping box
- 42 progressPACK GRASS LINE

**Transport system packaging**  
with self-adhesive seal

- 44 Shipping transport system cartons
- 45 System interlinings
- 46 Transport moving boxes
- 47 progressBOX SUPERFLAP

**Retention packaging**  
without filling material

- 48 Fixpack Crepe "PREMIUM"
- 49 Fixtray "PREMIUM"
- 50 Fixpack "PREMIUM"
- 52 Notebook Box + Fixtray Notebook

**Transport packaging**  
without self-adhesive seal

- 53 MAILBOX postal dispatch cartons
- 54 Shipping transport storage cartons
- 55 Folder transport cartons
- 56 Transport moving boxes

## Products with a positive ecological balance of recyclable raw materials. FSC® certified.

### The FSC® seal

FSC® is short for “Forest Stewardship Council®” and stands for eco-friendly, socially responsible and economically sustainable use of forests. Ten globally applicable principles guarantee that wooden and paper products having an FSC® seal come from responsibly managed forests. These principles have been laid down in an international standard. The FSC® standard requires that the ecological functions of a forest are preserved. It protects endangered animal and plant species and secures the rights of indigenous people and workers. However, the idea that an FSC®-certified forest is a totally untouched part of nature is incorrect. It is a forest that is used, but by following strict principles and criteria, which can preserve the forest as an ecosystem in the long term.

Das Zeichen für verantwortungsvolle Waldbirtschaft.

### Sustainable through rotting

The majority of man-made islands are located in the Pacific Ocean, between USA and China. Meanwhile they cover an area of 1.3 million km<sup>2</sup>, i.e., 3.7 times the size of Germany. Unfortunately, they are entirely made of plastic waste, which decomposes very slowly. The wave motion and impact of UV light merely break down plastic waste. Sea creatures consume these particles as food and at times die a painful death. Due to this fact and the sad certainty that there are other swimming dumps of rubbish in our oceans, one can say that “Plastic is not at all environmentally compatible in practice”. Cardboard on the other hand is disposed of through responsible recycling. It is a raw material that decomposes quickly when compared to plastic. While it takes 120 years for a plastic bag to decompose, paper turns into dung in 1 to 3 years.

### Advantages of recycled paper

Paper recycling is being practised for several decades now and the special waste paper economic cycles in Europe are very well advanced. Moreover, the industry had equipped itself with advanced recycling methods to manage with minimum fresh water. Thus the production of recycled paper requires about two-thirds less energy and water. Above all however, recycling helps conserve wood, which is a natural resource. The recycled cardboard used at progress packaging is a 100% product of waste paper economic cycles. Since most of our products are made of unprocessed cardboard, there is no need to optically brighten the material by using chemicals. Progress packaging thus ensures the best possible ecological balance.

## Our creative lab

pro-creative - top level packaging design

Creativity and comprehensive knowledge of the type and function of packaging material are necessary to fulfil the complex packaging requirements. Likewise, the entire production process and the logistics and distribution of packaged goods must be taken into account in every development phase.

Using the latest CAD and CAM computer technology, our competent packaging developers develop packaging solutions that match your requirements. Our sample makers then create precise handmade samples, which serve as templates for subsequent machine-based production.

## Of international standard

Technology and service: pro-modern, pro-efficient

Not only packaging machinery but also the people who operate these usually complicated machines, the "machine operators", are quality guarantors. They must possess good specialised knowledge, experience, conscientiousness, responsiveness and a high sense of responsibility. Our machinery and employees in the field of Logistics and Fulfilment are also quality guarantors. With our accurate management and precise work, your product is in good hands and is punctually delivered at the desired location.

### Flagship project SSV JAHN REGENSBURG

The objective of SSV Jahn Regensburg was to reduce the currently used packaging currently used for promotional items to just a few sizes. Furthermore, attractive packaging was to be developed and designed for different promotional and sales items.

**Shipping boxes  
with self-adhesive seal  
and tear strip with  
Jahn logo and lettering**

**Conception:** The reduction of the currently existing 8 cardboard boxes used in shipping to 3-4 sizes.  
**Material:** sturdy corrugated cardboard with outer liner Kraftliner  
**Print:** flexo print 1-color black  
**Use:** Shipping of promo and sales material

**Jahn baby gift box  
for cosmetic tissues**

**Conception:** gift box for cosmetic wipes with different thickness.  
**Material:** high quality solid cardboard 300g  
**Printing:** offset printing 4 colors + 1 special color + varnish  
**Service:** Development, Design, Offestdruck, Punching, Gluing, storage, just in time shipping

**Collection box for printed tickets**

**Concept:** Development of an attractive storage box with 17 compartments for all home game admission tickets with 2 pockets for admission cards.  
**Collecting box for admission tickets**  
**Material:** Box: very stable corrugated cardboard, inside kraft liner outside with offset printed solid cardboard 230g laminated  
**Compartments:** kraft cardboard 300g  
**Closure:** by means of magnetic holding points  
**Service:** development, design (layout), offset printing, die-cutting, machine gluing, hand gluing, packing, storage, just in time shipping.

# n a single source

**Jahn Multibox** based on the progresspack "Postbox Secure" maxi letter format with self-adhesive seal and tear open strip

**Conception:** Shipping carton in Post Maxibrief format which can be individually adapted to the intended with inserts.

**Material:** sturdy corrugated cardboard with Kraftliner outer liner  
**Service:** flexo printing, die-cutting, gluing, self-adhesive closure, storage, just-in-time shipping.

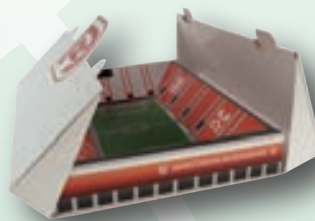

**Insert:** as shown here with reversible insert for ballpoint pens and acrylic displays as well as for dispatch of the welcome package (stadium)

Design

Digital Service Muster

Produktion

**Welcome packaging for Promotion in shape of the Jahn Stadium Regensburg**

**Conception:** Development of packaging as a welcome package for new Jahn members to send promotion. The packaging should be representative also after the dispatch. It consists of two parts.

**Material:** high quality solid cardboard 350g  
**Printing:** offset printing 4-color + 1 special color + varnish  
**Service:** development, design (layout), offset printing, die-cutting, gluing, packing, storage, just in time Shipping

**Conception:** Development of an attractive mailing letter for 1-2 Jahn season tickets incl. cover letter DIN A4 under 50g by mail.

**Material:** highest quality solid cardboard 250g  
**Print:** Offset printing 4-color + 1 special color + varnish  
**Service:** Development, design (layout), offset printing, die-cutting, gluing, storage, just-in-time mailing  
**Application:** dispatch mailer for season tickets with cover letter DIN A4I

**Shipping letter for season-ticket cards with self adhesive seal and tear open perforation**

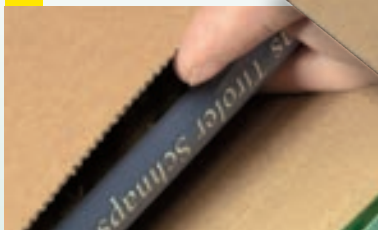

## "ECO" mailing envelope

diagonal, made of robust corrugated cardboard, brown

### Application areas

Catalogues, brochures, magazines, books, calendars, documents, DVDs, CD-ROMs, photos, shipments etc.

Very eco-friendly and economical thanks to progressPACK economy quality

Can be filled securely; safety wave cut

Distinctive edge protection

Can be sealed securely; progress self-adhesive seal

Can be opened securely; progress tear-off strip

### Advantages

- Very high anti-kink protection
- Circumferential edge protection
- Side filling facilitates
- quicker filling
- Safety wave cut for protection against injury
- Tear-off strip for secure opening
- Secure and eco-friendly
- self-adhesive seal
- Variable fill levels up to approx. 30 mm

# "ECO" Universal shipping packaging

for wrapping, made of robust corrugated cardboard;  
variable fill levels, brown

### Advantages

- Packaged goods holder with "stand-up" function using hinge grooving
- Variable fill levels up to 80 mm
- Safety wave cut for protection against injury
- Circumferential edge protection
- Tear-off strip for secure opening
- Secure and eco-friendly self-adhesive seal
- FSC-certified

### Application areas

Books, printed media, multimedia-, electronic devices, advertisement, textiles etc

"Stand-up" function using hinge grooving; quick filling

Can be sealed securely; progress self-adhesive seal

Secure circumferential edge protection

Can be opened securely, progress tear-off strip

Very eco-friendly and economical thanks to progressPACK economy quality

## "PREMIUM EXTRA" trapezium shipping packaging

for rolled goods; made of extremely robust, double corrugated-cardboard, brown

### Application areas

Suitable for shipping rolled goods such as posters, plans, portraits, proofs, documents, calendars, umbrellas, pipes, rails etc.

Can be assembled very quickly

Can be sealed securely; progress self-adhesive seal

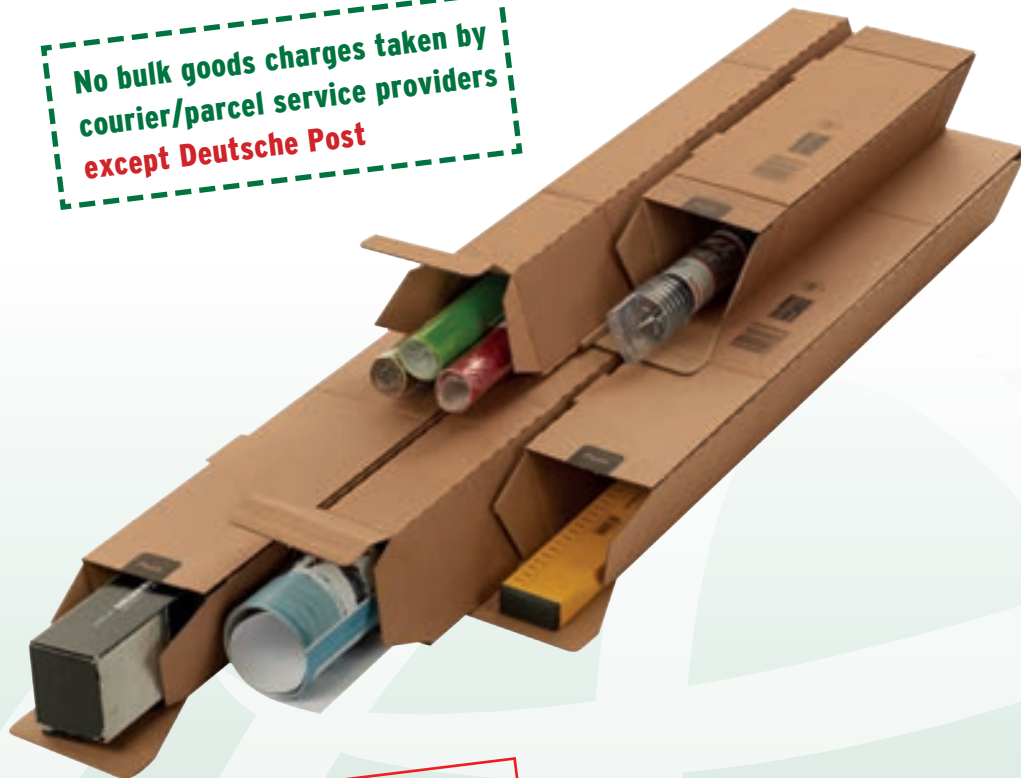

Easily sealed

Can be opened quickly; resealable

No bulk goods charges taken by courier/parcel service providers except Deutsche Post

### Advantages

- Very sturdy thanks to the trapezium shape and double corrugated cardboard
- Easy, efficient handling, can be assembled very quickly
- Can be stacked and does not roll off - archiving
- Flat-pack delivery saves storage space
- Machine labelling is possible
- Safety wave cut for protection against injury
- Quick and easy to open
- Secure and eco-friendly self-adhesive seal

# "PREMIUM" longBOX TELESCOPE M, L, XL, for very long, rolled goods; made of extremely robust corrugated cardboard, brown

### Application areas

Suitable for shipping long goods such as umbrellas, pipes, rails, threaded rods and rolled goods such as posters, plans, portraits, photos, proofs, documents, calendars etc.

### Advantages

- Telescopic using progressPACK longBOX 1 x LB ... + 1 x LBT ... or 1 x LBT ... + 1 x LB ... + 1 x LBT ...
- Very sturdy because of the progressPACK telescopic fastening, both parts are joined together firmly
- Maximum sturdiness due to the laterally deflected inner flaps and due to very good corrugated cardboard quality
- Can be stacked and does not roll off
- Simple and efficient handling - quick assembly
- Secure and eco-friendly self-adhesive seal
- Machine labelling is possible
- Quick and secure opening with the help of the tear-off strip

Telescopic using progressPACK long-BOX M, L, XL - now even wider.

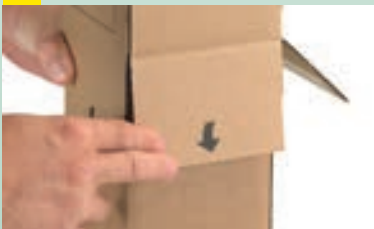

Seal both packaging parts on one side

Peel off the silicon covering sheet of the progress self-adhesive seal

Push the closing flaps apart and slide into each other

Stick both parts together at the desired length

Can be opened securely; progress tear-off strip

# FLIXBOX® STANDARD „PREMIUM“

Made of extremely stable corrugated cardboard, with self-adhesive seal and fully overlapping lid for secure closure

### Application areas

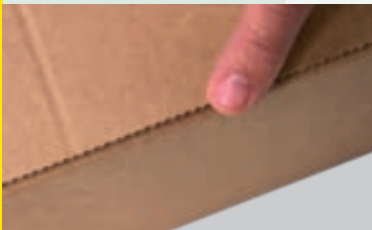

Office products, food, tools, spare parts, advertising and gifts, pharmaceuticals and cosmetics, EDV, electronics

Can be sealed securely and quickly with the progress self-adhesive seal

Can be opened securely by the progress tear-off strip

With safety wave cut

Can be assembled very quickly; very sturdy base

### Advantages

- Secure closure due to fully overlapping cover flaps
- Tear-off strip for secure opening
- Safety wave cut for protection against injury
- Efficient handling and quick assembly
- Extremely sturdy quality

# „PREMIUM“ WINEBOX MULTI

made of extremely robust cardboard; DHL certified packaging with a strong edge protection

The all-rounder for shipping Bordeaux bottles and Burgundy bottles (0.75 l)

Sturdy shipping box with strong edge protection due to integrated inner packaging - all in one

**New!**

Space-saving flat delivery

Quick and simple assembly and filling; one-piece solution

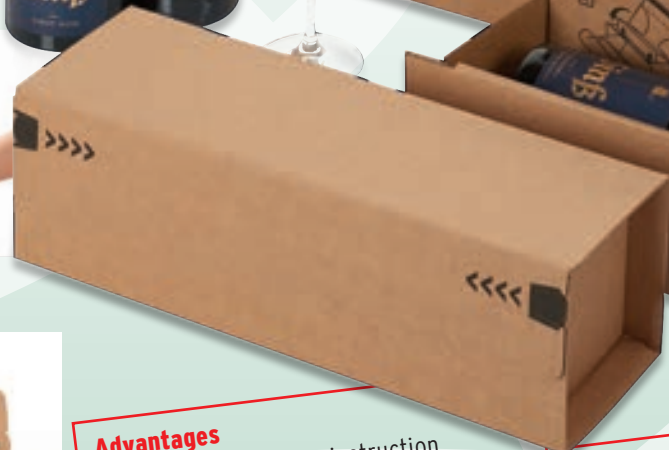

Efficient handling during sealing the box

Secure and quick sealing with the progress self-adhesive seal

Simple and secure opening with progress tear-off strip

### Advantages

- Useful imprint of the instruction
- Tear-off strip for easy and secure opening
- Safety wave cut for protection against injury

### Advantages

- Efficient handling and quick assembly
- Extremely sturdy quality
- Circumferential and strong edge protection

### Application area

For shipping Bordeaux bottles 0.75l and Burgundy bottles 0.75l

The inner rhombus shape enables shipping without additional filling material

## Universal shipping packaging „GRASSLINE“

for wrapping, made of extremely robust corrugated GRASSLINE cardboard; brown

Can be opened securely using the progress tear-open strip

Can be sealed securely with the progress self-adhesive seal

Secure circumferential edge protection

### Advantages

- Book wrap with "stand-up" function
- Variable fill heights up to 80mm
- Safety cut for protection against injury
- Circumferential edge protection
- Tear-open strip for secure opening
- Secure and eco-friendly self-adhesive seal

## longBOX M Universal mailing tube „GRASSLINE“

Square-shaped, for long and rolled goods; made of very robust corrugated GRASSLINE cardboard, brown

### Advantages

- Maximum sturdiness due to the laterally deflected inner flaps and due to very good corrugated cardboard
- Can be stacked - does not roll off
- Simple and efficient handling - quick assembly
- Secure and eco-friendly self-adhesive seal
- Machine labelling is possible
- Tear-off strip for secure opening

# "PREMIUM" system shipping transport carton

made of extremely robust corrugated cardboard, brown; with "progressBOX base"

Tear-off strip technique on the base and cover for maximum safety

With the progressBOX base developed by us for extreme sturdiness

### Application areas

Universally usable for shipping and transporting light, medium-heavy and heavy weight packaged goods

Efficient progress self-adhesive technique on the base saves time and sealings

Simply insert; glue flap locks automatically and lends extreme sturdiness

Can be sealed securely with the progress self-adhesive seal

Can be opened securely, progress tear-off strip

### Advantages

- Efficient handling and quick assembly thanks to the self-adhesive technique on the base and cover
- No need for adhesive tape anymore
- Extremely sturdy base even in the 1-wave design
- Can be moved on a roller conveyor - no catching
- Variable fill levels save time and additional fill

## "PREMIUM" progressBOX interlining

made of extremely robust corrugated cardboard; selfadhesive, infinitely variable

**Ideal substitute for your system packaging. Suitable for progressBOX transport and dispatch cartons**

**Application areas**  
For securing packaged goods in the progressBOX system, shipping and transport carton

Place the packaged goods inside

Roll up the interlining

Remove the silicon tape from the self-adhesive seal

Press the interlining down to the height of the packaged goods and press the fixing flaps

Quick and secure opening with the help of the tear-off strip - sharp blade not required

### Advantages

- Efficient, safe and quick securing of packaged goods using the self-adhesive safety-fixing flaps; infinitely variable irrespective of the fill level
- Saves time and fill
- Extremely sturdy due to selected, reliable quality

# "PREMIUM" system shipping transport carton with SuperFLAP

with double sealing technology; single flute and double flute; made of robust corrugated cardboard, brown

### Basic construction

Fold the flat carton

Fold down the upper cover flaps ...

... Reshape it backwards

Stick the base flaps inward; stick the closing flaps using the progress self-adhesive seal

The insert flap sticks firmly to the base, providing extreme sturdiness; the carton is now ready for use

### For use as safety clasp

Remove the cover flaps

Remove both cover strips once securely sealed. . .

... and seal it using the progress selfadhesive seal

Can be opened securely using the progress tear-off strip

### For use as return clasp

Remove the cover strip affixed to the deflecting outer side ...

... and seal it using the progress selfadhesive seal

Open using the upper progress tear-off strip

Seal with the second progress selfadhesive seal and return

Use the second progress tear-off strip for opening

### progressBOX base:

The new progressBOX base, which has been specially developed by us, guarantees high load capacity and sturdiness even in the 1-flute design. Moreover, there is no need whatsoever for any adhesive tape.

### progressBOX Superflap:

Cover flaps remain deflected downward till the filling process is complete; the carton can therefore be easily transported on roller conveyors, for instance for filling. The carton is sealed only when all parts are inside it - as safety clasp with both self-adhesive strips or as return clasp with one self-adhesive strip

# "PREMIUM" system shipping transport carton with SuperFLAP

with double sealing technology; 1-wave and 2-wave; made of robust corrugated cardboard, brown

**Application areas**  
Universally usable, for shipping, packaging and storage

### Advantages

- Double sealing system - as safety clasp, as return clasp
- Efficient handling, quick assembly thanks to the self-adhesive technique on the base and cover
- No need whatsoever for any adhesive tape
- Extremely sturdy base even in the 1-flute design
- Can be moved on a rollerconveyor - no catching
- Tear-off strip technique on base and cover for maximum safety
- Variable fill levels save time and additional fill

... watch our video!

# Fixpack "CREPE" PAPERFIX "PREMIUM"

Crepe retention packaging, made from extremely sturdy corrugated cardboard and crepe paper. For secure and environment-friendly shipping of sensitive goods.

## Application areas

IT hardware and electronics, spare parts, glas, porzellan, ceramics, pharmaceutical products, toys, promotion materials etc. up to 25mm height

## Advantages

- All in one packaging
- fast and secure retention of the packed goods
- no filling material necessary
- flat-pack, compact delivery
- eco-friendly due to simple separation of film and corrugated board
- low weight
- effective handling
- extremely environmently friendly due to the usage of crepe paper
- can be fed entirely into the paper recycling circuit

progress<sup>®</sup>  
FIX

Put the goods under the crepe paper

Fold up the retention unit and wrap over the shipping box unit

secure and easy opening with the progress tear-off strip

secure and fast sealing with the progress self-adhesive closure

## Fixtray "PREMIUM"

Film retention packaging tray, made from extremely sturdy corrugated cardboard and PE film - for secure shipping of sensitive products;

### Advantages

- fast and secure retention of the goods during shipping
- no filling material necessary
- flat-pack, compact delivery
- low weight
- effective handling
- high visibility of the packed goods
- 100% compatible with progressPACK cardboard boxes

### Advantages

- eco-friendly due to simple separation of film and corrugated cardboard

Put the goods under the film

By folding the flaps the goods are fastened down

With the next flaps folded upwards it's ready for boxing

Insertion into the compatible cardboard box

We also develop your individual solution depending on terms of size, corrugated cardboard quality and film thickness needs!

### Application areas

Spare parts, electronics, glass, ceramics, porcellain, pharmaceutical products, toys, promotional products etc.

## Book transport box, brown

Very sturdy; with double transport base

Very sturdy transport base

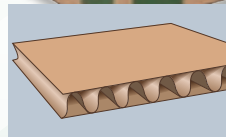

Convenient transport handles

### Advantages

- Double transport base, very sturdy
- Stable cardboard quality
- Flat-pack, compact delivery
- Convenient transport handles
- 100% recycled cardboard

### Application areas

Transport of books and heavy transport goods; ideal for moves

1-wave quality

**Werner Fink**  
Managing Director  
progress packaging GmbH

## A sturdy sheet of paper.

Dear Customer, Dear Interested Party,

Do you know of a packaging filler that is produced 100% from recycled paper and therefore can also be disposed of in the green paper bin?

It is **progressFILL**, with its range of amazing features!

This sturdy sheet of paper expands with a value of 10:400 and turns from a handy roll into 400 litres of filler.

**progressFILL** has a special fold that is designed to enable the individual parts to interlock in the mix, thereby forming highly effective all-round protection for the packaged goods.

**progressFILL** is antistatic, clean and dust-free, and has absorbent properties! **progressFILL** is free-flowing, so it is easy to measure out and can be handled super-fast!

**progressFILL** is available in two variants.

**progressFILL "PAPERFILL"** is the economy solution for conventional industrial use.

**progressFILL "DECOFILL"** is the coloured solution for decorative or promotional use. Both variants are FSC-certified and are made of 100% recycled paper. In addition, **progressFILL** can even be printed individually.

**progressFILL** is conveniently available in sacks and cartons for small to medium requirements. A service-friendly machine solution is available for medium to large requirements. You can produce the filler on-site, thereby enhancing the ecological balance even more significantly due to the lower transport volume.

Simply try out **progressFILL** and convince yourself of our super-advanced filler, our first-class service and our customer satisfaction guarantee.

We at **progress packaging** have made environmental protection a central component of our corporate strategy. We are pursuing this strategy with our filler as well as with our packaging products. Moreover, our service-friendly, tried and tested container shapes in 120, 240, 360 and 400 litres containers, together with suitable attachments, are, of course, available for immediate delivery!

Yours, Werner Fink

# progressFILL filling and padding chips

## The advantages at a glance

### 100% environmentally friendly

- The waste water load is 10x lower than in the production of virgin fibre paper
- progressFILL is made of 100% recycled paper
- Environmentally friendly filler for which no trees have to be cut down

### Positive ecological balance

- Over 100,000 litres of progressFILL filler from 4 Euro pallets of raw paper
- Positive ecological balance of progressFILL

### Environmentally friendly disposal

- progressFILL can be disposed of in the green paper bin
- Expansion is once again reduced to a large extent under high pressure

### Superb protection for packaged goods

- Interlocking, dish-shaped chips surround the packaged goods to be protected.
- All-round protection with a strong padding characteristic

### Absorbent

- Exceptionally voluminous and stable paper absorbs spilled liquids

### Superb handling

- Free-flowing due to its composition
- Available in cartons with fillers for the smallest quantities (120, 240 and 360 litres) and in sacks for small to medium quantities (400 litres)
- No annoying static charge

### Clean and dust-free

- Paper selection guarantees a dust-free, clean filler.

### Useful and decorative

- "DECOFILL" our coloured filler in 9 standard colours
- For promotional use - customised colour or logo can be printed starting from 90 sacks of 400 litres each.

### Impressive price-performance ratio

- PAPERFILL, DECOFILL at the best price

### Certified

- Products from renewable raw materials
- Raw material tested for social, economic and ecological impact
- Conforms to the principles of the Forest Stewardship Council

Progress padding chips are made from recycled paper

Over 100,000 litres of fillers are made from four pallets of raw paper

Padding chips interlock and have phenomenal padding characteristics

Padding chips are made of volume paper and are therefore very absorbent

Paper is electrically insulating. No disturbing static charge

Excellent price-performance ratio

progressFILL can be promptly of in the waste paper bin

## progressFILL rolled material

PAPERFILL and DECOFILL made from 100% recycled paper

If you produce your padding chips yourself and order the rolled material from us, you will increase the positive ecological balance of progressFILL even more significantly. The reduction in transportation costs becomes clear when you consider that the roll of material for 105 m<sup>3</sup> filler (3 x 14 x 2.5 m) can fit on just 3 pallets.

## progressFILL FILLMAT 1000M

The second generation of our machine solution for industrial usage. Now even faster and more robust. The economic solution for all who have demand from 3 bags daily!

Without any capital investment - super Service

With the machine solution, the full strength of progressFILL, based on its enormous expansion capacity, comes into its own. **We transport 105,000 l of filler on 4 Euro pallets** (220 bags = 88,000 l - 1 truck load).

With the FILLMAT 1000M, you can produce up to 6,400 litres or 16 sacks of 400 litres of packaging filler per day on only approx. 1 m<sup>2</sup> and without any capital investment for the machine. **You buy the rolls and we take care of the rest.** No machine costs, no maintenance costs, no costs for setting up the machine. 1 roll = 1 bag à 400 ltr. Try our customer satisfaction guarantee!

superior construction based on years of know-how

Laying on the roll is quite simple

Simple intuitive and quick threading

user-friendly bag holder, the bag clamps perfectly

Close the door with the safety switch, Press the button and off you go.

# progressFILL FILLBOX 800

the professional filling station for progressFILL PAD's  
Can be customized to your workflow

The Fillbox 800 is the perfect filling station for our progressFILL padding chips.

The Fillbox contains 800 liters of padding chips.  
= 2 bags à 400 ltr. or 2 rolls à 400 ltr. or 1 roll à 800 ltr.

The Fillbox 800 can be installed "stand alone" or in a row for multiple workspaces.

The Fillbox 800 can be mounted on the wall or on the ceiling.

**We will supply a customized and perfect solution for your filling station!**

Transparent container - fill level easily visible

Our solution ensures a good and permanent flow of the padding chips.

The ergonomic design of the filling tongs enables packaging without fatigue.

Fits in any workflow, on an assembly line or at a stationary device

simple and eco-friendly disposal in the paper bin (recycling)

**Time savings due to fast filling process!**  
**Can be customized to any workstation!**  
**Please contact us!**

- exact dosing
- fast and clean filling process
- ergonomic handle of the filling tongs
- flexible drop hose
- perfect workflow
- perfect technical solution

# progressFILL PAPERFILL

Filling and padding chips, an economical solution made of 100% recycled paper

Good flow guarantees quick filling - efficient handling

Padding chips fix the packaged goods and prevent them from moving.

Ideal for filling up hollow spaces and for topping up.

progressFILL is very sturdy

Interlocking, dish-shaped chips form a safe protective cover around the packaged goods

progressFILL packs tool parts or even liquids and is absorbent.

Best suited for packing objects in cartons and preventing them from moving.

Can be disposed of in the waste paper basket easily and without any problems - natural recycling economy

# The new PP2B Portal

## 1. Login, Client No., Passwort

The login area: Here you can securely log in with logins that can be requested on the back of this brochure or use your previous customer login.

## 2. Offers

Here you will find special offers that may be of interest to you, as well as information about our special promotions around the product world of Progress Packaging.

## 3. NEW products

Here you will find all our new products and enhancements at a glance.

## 4. Products / Price calculator

The heart of our portal, now even more clearly designed and easier to use.

Thanks to the new availability traffic light, you can see right away whether your desired product is in stock (green), a low stock quantity only allows parcel shipping (yellow) or the item is currently completely out of stock (red). Of course, we also tell you the expected date of availability. The new shopping cart function makes your order process now even clearer the export function (CSV and PDF) allows you to transfer the data into your ERP system.

## 5. Order overview / Shipment tracking

Enter your order number and view the status of the order. Under the column „TrackingNo.“ you can track the shipment by UPS.

## 6. Special Items

Here you can view special promotional items from Progress Packaging.

## 7. Backlogs

Overview of all items currently on backorder and their expected availability, as well as suggestions for replacement items.

## 8. Downloads

General Downloads: Catalogs, flyers, logos, terms & conditions & privacy policy, certificates, item list, price lists.

Image data: Image data directory of all our products for download

My Downloads: Conditions sheet, image data declaration, partner certificate, personalized print products (catalogs, flyers...) and other partner documents.

## 9. Inventories / framework agreements

Stock levels: Overview of the pallet quantity or ACTUAL stock of your customer items.

Master contracts: View all framework agreements with validity, article numbers, prices as well as contract, minimum call-off, already delivered and open quantities.

## 10. Message-Center

Important information about your orders, postponements of order confirmation, products, sales promotions. Set up a forwarding to their personal email address.
